 Faculty Opinions

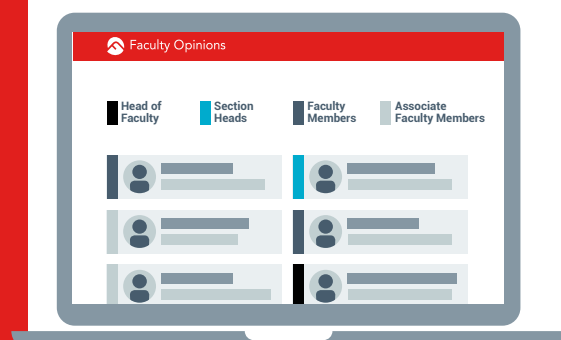

Discover

Peer-nominated Faculty Members continually filter the literature for you, to select articles they find particularly important and interesting, so you don't have to.

Gain Insight

Articles are assigned a star rating, categorized, and evaluated in a short, opinionated commentary outlining the value of the science to the wider community.

Customize Alerts

Create detailed and personalized search parameters, sign up for customized email alerts so you can easily access the article recommendations relevant to your fields of interest.

Used and loved by researchers across institutions and corporations.

Rapid article discovery

Prime recommendations highlight the articles you can't afford to miss, saving you time finding the most important papers.

Expert recommendations

Gain exclusive access to the opinions of leading scientists as they assess the impact of research findings on both your core fields of interest and neighboring fields.

Selected from a range of journals and publishing outlets

Recommended articles cover both the hot topics of the day as well as niche content that you may otherwise have missed or you don't have time to track.

Covering medical and life sciences literature

Faculties cover everything from fundamental biological research, through to clinical application and social and behavioral sciences.

“ The thing that's missing from a lot of online publications is the role of interpreter who is an expert in the field and who objectively puts things in the right perspective. Faculty Opinions provides this missing link through the voices of its broad and diverse faculty.

Edward J. Benz Jr.

President, Dana-Farber Cancer Institute

“ ...with Faculty Opinions, I have absolute confidence that I am passing on a highly curated document that has real weight behind it. It's incredibly satisfying to know that the research I've found, and shared, will ultimately aid problem solving and decision making.

Judy Stribling

Medical Librarian, Weill Cornell Medicine
