- 3. The Product: TIB AV-Portal
- 4. Scope of Scrum Team
- 5. Empowerment of Scrum Team
- 6. Handling Complex Proplems

Scope of Scrum Team

- All work is done by a small Scrum team that is cross-functional
- "Cross-functional" means that the members have all the skills necessary to create value each Sprint.
- Skills of the AV-Portal Scrum Team:
 - frontend development
 - backend development
 - GUI
 - agile management
 - **.**..

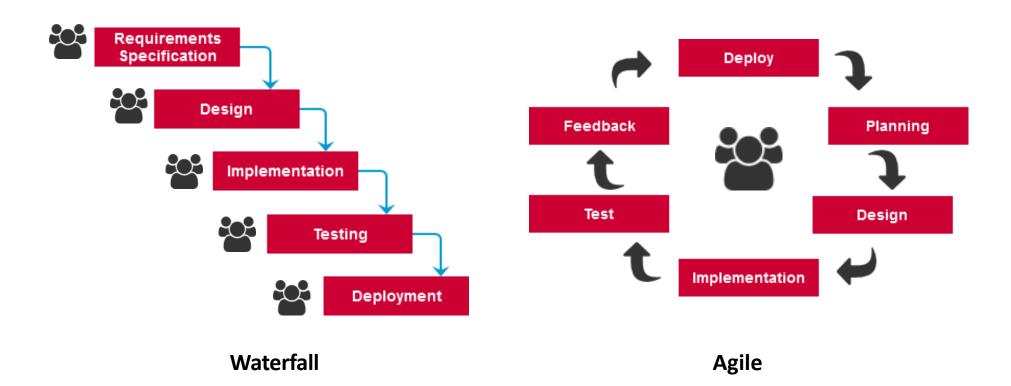

Scope of Scrum Team

- The entire Scrum Team is accountable for creating a valuable, useful Increment every Sprint.
- The Scrum Team is responsible for all product-related activities from stakeholder collaboration, verification, maintenance, operation, experimentation, research and development, and anything else that might be required.

Creating Value: Traditional vs. Agile

- 1. Scrum on one slide
- 2. Scrum Team for AV-Portal
- 3. The Product: TIB AV-Portal
- 4. Scope of Scrum Team
- 5. Empowerment of Scrum Team
- 6. Handling Complex Proplems

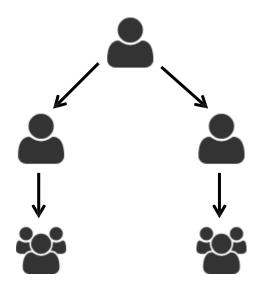

Empowerment of Scrum Team

- (Scrum Teams) are *self-managing*, *meaning they internally decide* who does what, when, and how.
- (Scrum Teams) are empowered by the organization to manage their own work.
- For Product Owners to succeed, the entire organization must respect their decisions.
- Those wanting to change the Product Backlog can do so by trying to convince the Product Owner.

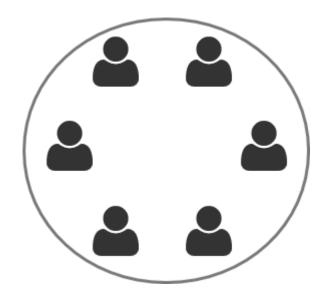

Management: Traditional vs. Agile

Traditional Pyramid

Agile Circle

- 4. Scope of Scrum Team
- 5. Empowerment of Scrum Team
- **6.** Handling Complex Proplems

Handling Complex Problems

- Within short iterations (sprints), the Scrum team creates increments on which stakeholders can provide feedback (iterative-incremental approach)
- Early feedback allows for quick adaptation to changing requirements and circumstances
- The Scrum team creates value in every sprint.
- In contrast: Traditional management relies on a long planning phase and a late Big Bang release, where feedback is obtained very late in the project

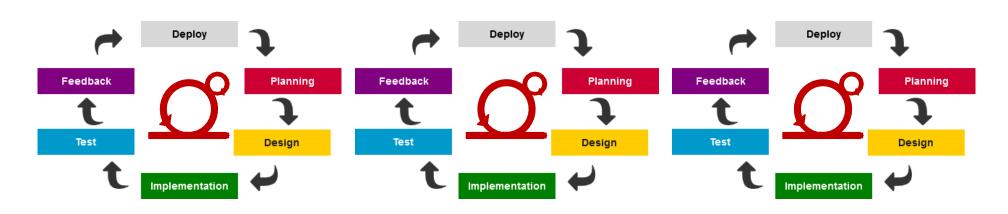

Releases: Traditional vs. Agile
